

Trend Micro Deep Security Integration with Sumo Logic

Solution Overview

Trend Micro Deep Security provides a comprehensive security solution that easily integrates with Sumo Logic's secure, cloud-native, machine data analytics service, delivering real-time, continuous intelligence in a single view across the entire application lifecycle and stack.

Organizations seek to gain a unified view of log data across an increasingly complex and heterogeneous environment to effectively detect and respond to indicators of compromise (IOCs) and identify anomalies and security vulnerabilities. Organizations may also have regulatory compliance requirements around centralized logging and data retention.

Sumo Logic App for Trend Micro Deep Security

Trend Micro™ Deep Security™ provides advanced server security for physical, virtual, and cloud servers. It protects enterprise applications and data from ransomware, breaches, and business disruptions without requiring emergency patching. All Deep Security modules are integrated into Sumo Logic service, with advanced visualizations and saved searches: Anti-Malware, Web Reputation, Intrusion Prevention (IPS), File Integrity Monitoring (FIM), Host Firewall, and Log Inspection.

Moving to the cloud does not require sacrificing visibility or control over your infrastructure and applications. Sumo Logic and Trend Micro have partnered to provide modern tools and services designed for the volume, variety and velocity of hybrid cloud-generated data and provide real-time operational and security visibility into your modern application stack.

Trend Micro

Trend Micro Incorporated, a global leader in cyber security solutions, helps to make the world safe for exchanging digital information.

Trend Micro™ Deep Security™ powers Trend Micro's Hybrid Cloud Security solution, providing market-leading security capabilities for physical, virtual, and cloud servers from a single integrated platform. Delivering automated cloud security, Deep Security provides flexible, scalable protection of operating systems, applications, and data without slowing you down. With over 5,000 employees in over 50 countries and the world's most advanced global threat intelligence, Trend Micro enables organizations to secure their journey to the cloud. For more information, visit www.trendmicro.com.

“Businesses face ever-growing and ever-changing threats on the Internet. By blocking threats, Deep Security and Sumo Logic protect the online experiences of our customers. This upholds our reputation and theirs.”

CISO, Web Hosting Company

Sumo Logic

Sumo Logic is a secure, cloud-native, machine data analytics service, delivering real-time, continuous intelligence from structured, semi-structured and unstructured data across the entire application lifecycle and stack. More than 1,000 customers around the globe rely on Sumo Logic for the analytics and insights to build, run and secure their modern applications and cloud infrastructures. With Sumo Logic, customers gain a multi-tenant, service-model advantage to accelerate their shift to continuous innovation, increasing competitive advantage, business value and growth.
